

214 Gin and Cocktail Bar

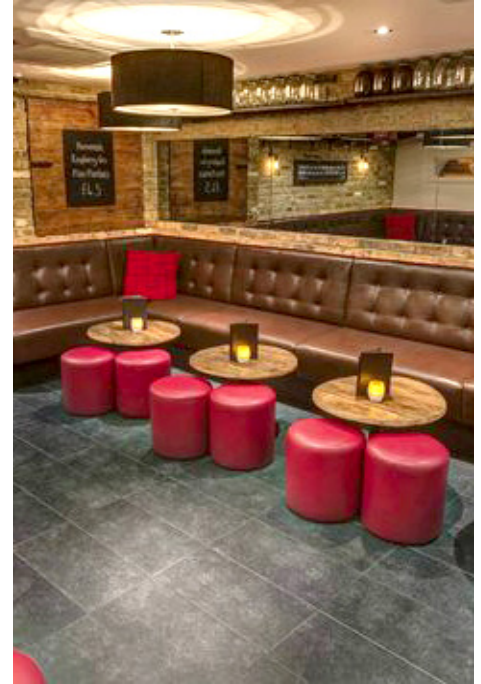

The Challenge

We were approached to provide a bespoke lighting system for a chic bar in London city centre.

The Solution

Allied conducted market research to present to the bar owners. From this, we could determine exactly what the client wanted.

Services Used

- Consultancy and Survey** - We worked with the client's architects and Celador Consulting to provide a high-quality lighting system.
- Report and Design** - Using both AutoCAD and Relux software, Allied presented a range of lighting designs before receiving the client's approval.
- Finance Modelling** - The project was self-funded by the client.
- Lamp Supply** - We provided a number of LED luminaires such as MR16 and MR11, LED strip and Lucid squares. Allied also provide a DALI dimming system to control the lighting.
- Install and Recycle** - Allied installed the system and luminaires as a specialist sub-contract
- Onsite and Warranty Support** - As with all Allied products, the customer received peace of mind with our five-year product warranty.

Customer Feedback

"we previously used Allied for a number of projects. We are confident with the client brief that they would supply a lighting system perfect for the Gin Bar"
